Board of Trustees
Employees' Retirement System of Georgia
Two Northside 75, Suite 300
Atlanta, GA 30318-7701

Members of the Board:

Presented in this report is information to assist the State Employees' Assurance Department Retired and Vested Inactive Members Trust Fund (SEAD) in meeting the requirements of the Governmental Accounting Standards Board (GASB) Statement No. 75 for the participating employers, and to identify the information to be provided by the actuary, CavMac. The information is presented for the period ending June 30, 2024 (the Measurement Date).

GASB Statement No. 75 (GASB 75) establishes accounting and financial reporting requirements for governmental employers who have other postemployment benefits (OPEB) plans.

The annual actuarial valuation performed as of June 30, 2023 was used as the basis for much of the information presented as of June 30, 2024 in this report. The valuation was based upon data provided by the Retirement System staff concerning active, inactive, and retired members along with pertinent and financial information. While not verifying data at the source, the actuary performed tests for consistency and reasonableness. The valuation results depend on the integrity of the data. If any of the information is inaccurate or incomplete, our results may be different and our calculations may need to be revised. Please see the actuarial valuation for additional details on the funding requirements for the System.

To the best of our knowledge, the information contained in this report is complete and accurate. The calculations were performed by qualified actuaries according to generally accepted actuarial principles and practices, as well as in conformity with Actuarial Standards of Practice issued by the Actuarial Standards Board. In order to prepare the results in this report, we have utilized actuarial models that were developed to measure liabilities and develop actuarial costs. These models include tools that we have produced and tested, along with commercially available valuation software that we have reviewed to confirm the appropriateness and accuracy of the output. In utilizing these models, we develop and use input parameters and assumptions about future contingent events along with recognized actuarial approaches to develop the needed results.

The calculations are based on the current provisions of the System and on actuarial assumptions that are, individually and in the aggregate, internally consistent and reasonably based on the actual experience of the System. In addition, the calculations were completed in compliance with the laws governing the System and, in our opinion, meet the requirements of GASB 74. Edward Koebel and Ben Mobley are members of the American Academy of Actuaries and meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein.

The calculation of the liability associated with the benefits described in this report was performed for the purpose of providing reporting and disclosure information that satisfies the requirements of GASB 74 and GASB 75 for accounting valuation purposes and may not be appropriate for funding purposes or other types of analysis. Calculations for purposes other than satisfying the requirements of GASB 74 and GASB 75 may produce significantly different results. Future actuarial results may differ significantly from the current results presented in this report due to such factors as changes in plan experience or changes in economic or demographic assumptions.

SECTION I - INTRODUCTION

REPORT OF THE ANNUAL GASB STATEMENT NO. 75 STATE EMPLOYEES' ASSURANCE DEPARTMENT RETIRED AND VESTED INACTIVE MEMBERS TRUST FUND

PREPARED AS OF JUNE 30, 2024

The Governmental Accounting Standards Board issued Statement No. 75 (GASB 75), *"Accounting and Financial Reporting for Postemployment Benefit Plans other than Pension"*, in June 2015. The effective date for reporting under GASB 75 is plan years beginning after June 15, 2017. The State Employees' Assurance Department Retired and Vested Inactive Members Trust Fund (SEAD) is a cost-sharing multiple employer plan. Members of the SEAD are certain participants in the Employees' Retirement System of Georgia (ERS), the Judicial Retirement System of Georgia (JRS), and the Legislative Retirement System of Georgia (LRS.)

This report, prepared as of June 30, 2024 (the Measurement Date), presents information to assist the employers participating in SEAD in meeting the requirements of GASB 75 for the fiscal year ending June 30, 2025 (the Reporting Date). Much of the material provided in this report is based on the data, assumptions and results of the annual actuarial valuation of SEAD as of June 30, 2023. The results of that valuation were detailed in a report dated April 18, 2024.

The Net OPEB Liability (Asset) (NOL) shown in the GASB Statement No. 74 Report for the State Employees' Assurance Department Retired and Vested Inactive Members Trust Fund Prepared as of June 30, 2024 and submitted September 12, 2024 is the collective NOL used for purposes of GASB 75. Please refer to that report for the derivation of the collective NOL.

OPEB Expense (OE) includes amounts for Service Cost (the Normal Cost under Entry Age Normal (EAN) for the year), interest on the TOL, employee contributions, administrative expenses, other cash flows during the year, recognition of increases/decreases in the TOL due to changes in the benefit structure, actual versus expected experience, actuarial assumption changes, and recognition of investment gains/losses. The actual experience and assumption change impacts are recognized over the average expected remaining service life of the Plan membership as of the beginning of the measurement period, while investment gains/losses are recognized equally over five years. The development of the OE is shown in Section IV.

The unamortized portions of each year's experience, assumption changes and investment gains/losses are used to develop deferred inflows and outflows, which also must be included in the employer's and nonemployer contributing entities' financial statements. The development of the collective deferred inflows and outflows is shown in Section III.

SECTION I - INTRODUCTION

Since there are currently no required employer contributions to SEAD, these collective amounts have been allocated based on fiscal year payroll of SEAD members during the measurement period to determine the proportionate share associated with each participating employer. If employer contributions were required, SEAD would receive contributions directly from the State Department of Revenue (DOR) and from the State Courts for certain members of ERS who are employees of certain participating employers. The State would make contributions to SEAD for its employees who are members of JRS and also on behalf of members of JRS who are employees of the participating county employers. Therefore, these employers are considered to be in a special funding situation as defined by GASB 75 and the DOR, State Courts, and the State of Georgia are treated as a nonemployer contributing entities in SEAD.

For these employers that would not contribute directly to the SEAD, there is no NOL or deferred inflows or outflows to report in their financial statements. However, the notes to the financial statements must disclose the portion of the nonemployer contributing entities' total proportionate share of the collective NOL that is associated with the employer. In addition, each of these employers must recognize the total OE associated with the employer as well as revenue in an amount equal to the nonemployer contributing entities' total proportionate share of the collective OE associated with the employer.

Schedule A of this report shows the amount of employer payroll for the years ending June 30, 2023 and June 30, 2024. Schedule A also shows the proportionate share percentages that have been determined based on these payrolls.

Based on these percentages we have determined the proportionate share amounts of the NOL, OE and Deferred Inflows and Deferred Outflows associated with each participating employer. These amounts are shown in Schedule B.

Section II of this report is a summary of the principal results of the collective amounts under GASB 75. Section III provides the results of all the necessary calculations, presented in the order laid out in GASB 75 for note disclosure and Section V shows the Required Supplementary Information (RSI).

The sections that follow provide the results of all the required calculations, presented in the order laid out in GASB 75 for note disclosure and Required Supplementary Information (RSI).

SECTION III - FINANCIAL STATEMENT NOTES

The material presented herein will follow the order presented in GASB 75. Paragraph numbers are provided for ease of reference.

Paragraph 92 and 93(a)-(d): These paragraphs require information to be disclosed regarding the actuarial assumptions used to measure the TOL. The complete set of actuarial assumptions utilized in developing the TOL are outlined in Schedule E. The TOL was determined by an actuarial valuation as of June 30, 2023, using the following key actuarial assumptions:

Inflation	2.50 percent
Salary increases, including inflation	
ERS	3.00 – 6.75 percent
JRS	3.75 percent
LRS	N/A
Investment rate of return	7.00 percent, net of investment expense, including inflation
Healthcare cost trend rate	N/A

Mortality rates are as follows:

- The Pub-2010 General Employee Table, with no adjustments, projected generationally with the MP-2019 Projection Scale is used for both males and females while in active service.
- The Pub-2010 Family of Tables projected generationally with the MP-2019 Projection Scale and with further adjustments are used for post-retirement mortality assumptions as follows:

Participant Type	Membership Table	Set Forward (+)/ Setback (-)	Adjustment to Rates
Service Retirees	General Healthy Annuitant	Male: +1; Female: +1	Male: 105%; Female: 108%
Disability Retirees	General Disabled	Male: -3; Female: 0	Male: 103%; Female: 106%
Beneficiaries	General Contingent Survivors	Male: +2; Female: +2	Male: 106%; Female: 105%

SECTION III - FINANCIAL STATEMENT NOTES

The actuarial assumptions used in the June 30, 2023 valuation were based on the results of actuarial experience studies for the three pension systems that have members participating in the Fund, covering the period from July 1, 2014 – June 30, 2019. In the experience studies, the long-term assumed rate of return that was recommended by the actuary and adopted by the Board was 7.00%. Based on the funding policy adopted by the Board, the assumed investment rate of return used in the funding valuation will be reduced by 0.10% (10 basis points) from the immediate prior actuarial valuation, if the actual rate of return for the fiscal year ending with the current valuation date exceeds the assumed rate of return from the immediate prior actuarial valuation, until the rate reaches the long-term assumed investment rate of return. However, for GASB purposes, the Total OPEB Liability (TOL) will be based on the long-term assumed investment rate of return of 7.00%.

93(e) Sensitivity analysis: Disclosure of the sensitivity of the Net OPEB Liability (Asset) to changes in the healthcare cost trend rate. N/A.

Paragraph 94 (a)-(f): The OPEB plan investments are co-mingled with the investments of all pension plans administered by the Employees Retirement System of Georgia. The long-term expected rate of return on OPEB plan investments was determined using a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return (expected returns, net of OPEB plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

The target asset allocation and best estimates of arithmetic real rates of return as provided by the Fund for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return*
Fixed Income	30.0%	1.5%
US Large Stocks	46.4%	9.1%
US Small Stocks	1.1%	13.0%
Int'l Developed Mkt Stocks	13.6%	9.1%
Int'l Emerging Mkt Stocks	3.9%	11.1%
Alternatives	5.0%	10.6%
Total	100.0%	

*Net of inflation

SECTION III - FINANCIAL STATEMENT NOTES

Discount rate. The discount rate used to measure the total OPEB liability was 7.00 percent. The projection of cash flows used to determine the discount rate assumed that plan member insurance premiums will be made at the current contribution rates and that employer and nonemployer contributions will be made at the actuarially determined employer contribution rate. Based on those assumptions, the OPEB plan’s fiduciary net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on OPEB plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability.

Paragraph 94(g): This paragraph requires disclosure of the sensitivity of the Net OPEB Liability (Asset) to changes in the the discount rate. The following presents the Net OPEB Liability (Asset), calculated using the discount rate of 7.00 percent, as well as the Net OPEB Liability (Asset) calculated using a discount rate that is 1-percentage-point lower (6.00 percent) or 1-percentage-point higher (8.00 percent) than the current rate (\$ thousands):

	1% Decrease (6.00%)	Current Discount Rate (7.00%)	1% Increase (8.00%)
Fund’s Net OPEB Liability (Asset)	\$(429,845)	\$(561,262)	\$(669,239)

Paragraph 96(a): This paragraph requires the disclosure of the employer’s proportionate share of the Collective NOL and if an employer has as special funding situation, the portion of the nonemployer contributing entities proportionate share of the collective NOL that is associated with the employer. These amounts are shown in Schedule B.

Paragraph 96(b): This paragraph requires disclosure of the employer’s proportion of the collective NOL and the change in the proportion since the prior measurement date. These amounts are shown in Schedule A.

Paragraph 96(c): June 30, 2023 is the actuarial valuation date upon which the TOL is based. An expected TOL is determined as of June 30, 2024 using standard roll-forward techniques. The procedure used to determine the TOL as of June 30, 2024 is shown on page 7 of the GASB 74 report for SEAD submitted September 12, 2024.

Paragraphs 96(d): There were no changes in the assumptions that affected the measurement of the TOL since the prior measurement date.

Paragraphs 96(e): There were no changes in the benefit terms that affected the measurement of the TOL since the prior measurement date.

SECTION III - FINANCIAL STATEMENT NOTES

Paragraph 96(f): There were no changes between the measurement date of the collective net OPEB liability (asset) and the employer's reporting date.

Paragraph 96(g): Please see Section V of the report for the development of the collective OPEB expense. The OE for each employer is shown in Schedule B.

Paragraph 96(h): Since certain expense items are amortized over closed periods each year, the deferred portions of these items must be tracked annually. If the amounts serve to reduce OPEB expense they are labeled deferred inflows. If the amounts will increase OPEB expense they are labeled deferred outflows. As noted in the previous section, the amortization of these amounts is accomplished on a level dollar basis, with no interest included in the deferred amounts. Experience gains/losses and the impact of changes in actuarial assumptions, if any, are amortized over the average remaining service life of the active and inactive Plan members at the beginning of the measurement period. Investment gains and losses are amortized over a fixed five-year period.

The following table provides a summary of the collective deferred inflows and outflows of resources as of the Measurement Date.

	Collective Deferred Outflows of Resources (\$ thousands)	Collective Deferred Inflows of Resources (\$ thousands)

SECTION III - FINANCIAL STATEMENT NOTES

Paragraph 96(i): The collective amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in OPEB expense as follows:

Deferred Amounts to be recognized in Fiscal Years Ending	
	Deferred Outflows / (Inflows) of Resources (\$ thousands)
Year 1	\$(25,215)
Year 2	\$27,099
Year 3	\$(30,337)
Year 4	\$(19,340)
Year 5	\$0
Thereafter	\$0

Paragraph 96(j): The amount of revenue recognized for the support provided by nonemployer contributing entities for the participating employers. The Plan will provide this information.

SECTION IV - OPEB EXPENSE

The OPEB Expense (OE) consists of a number of different items. GASB 75 refers to the first item as Service Cost which is the Normal Cost using the Entry Age Normal actuarial funding method. The second item is interest on the TOL at the Discount Rate in effect as of the Prior Measurement Date.

The next three items refer to any changes that occurred in the TOL due to:

- benefit changes, or
- actual versus expected experience, or
- changes in assumptions or other inputs.

Benefit changes, which are reflected immediately, will increase OE if there is a benefit improvement for existing Plan members or decrease OE if there is a benefit reduction. For the year ended June 30, 2024, there were no benefit changes to be recognized.

The next item to be recognized is the portion of current year changes in TOL due to actual versus expected Plan experience for the year. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire Plan membership determined at the beginning of the measurement period. The average expected remaining service life of active members is the average number of years the active members are expected to remain active. For the year ended June 30, 2024, this number of years for the active members is 5.8. The average expected remaining service life of the inactive members is zero. The number of years to use for the amortization is the weighted average for all active and inactive members, or 1.5 years.

The last item under changes in TOL are changes in actuarial assumptions. The portion to recognize in the current year is determined by spreading the total change over the average expected remaining service life of the entire Plan membership, or 1.5 years.

Member contributions for the year and projected earnings on the FNP at the discount rate serve to reduce the expense. One-fifth of current-period difference between actual and projected earning on the FNP are recognized in the OPEB expense.

The current year portions of previously determined experience and assumption amounts, recognized as Deferred Outflows of Resources and Deferred Inflows of Resources are included. Deferred Outflows of Resources are added to the OE while Deferred Inflows of Resources are subtracted from the OE. Finally, other miscellaneous items are included.

SECTION IV - OPEB EXPENSE

Service Cost	\$ 2,228
Interest on the TOL and net cash flow	\$ 67,632
Current-period benefit changes	\$ 0

SECTION V - REQUIRED SUPPLEMENTARY INFORMATION

Paragraph 98: Information about factors that significantly affect trends in the amounts in the schedules required by paragraph 98 should be presented as notes to the schedule. Comments on additional years will be added as they occur.

Changes of benefit terms. None.

Changes of assumptions.

A new funding policy was adopted by the Board on March 15, 2018. Because of this new funding policy, the assumed investment rate of return was reduced from 7.50% to 7.40% for the June 30, 2017 actuarial valuation and further reduced from 7.40% to 7.30% for the June 30, 2018 actuarial valuation.

On December 17, 2020, the Board adopted recommended changes to the economic and demographic assumptions utilized by the Systems based on the experience study prepared for the five-year period ending June 30, 2019. Primary among the changes were the updates to rates of mortality, retirement, withdrawal, and salary increases. This also included a change to the long-term assumed investment rate of return to 7.00%. These assumption changes were first reflected in the calculation of the June 30, 2021 Total OPEB Liability.

Methods and assumptions used in calculations of actuarially determined contributions.

The actuarially determined contribution rates in the schedule of employer contributions are calculated as of June 30, three years prior to the end of the fiscal year in which contributions are reported. The June 30, 2024 employer contributions were determined in the June 30, 2021 valuation. The following actuarial methods and assumptions were used to determine the most recent contribution rate reported in that schedule:

Actuarial cost method	Entry Age
Amortization method	Level dollar, open
Remaining amortization period	Infinite
Asset valuation method	Fair value of assets
Inflation	2.50 percent
Salary increase, including inflation	
ERS	3.00 – 6.75 percent
JRS	3.75 percent
LRS	N/A
Healthcare Cost Trend Rate	N/A

SCHEDULE F - FUNDING POLICY #2 OF THE SEAD BOARD OF DIRECTORS

The purpose of this Funding Policy is to state the overall objectives for the Georgia Employees' Group Term Life Insurance Plan for Post-Retirement Benefits (System), the benchmarks that will be used to measure progress in achieving those goals, and the methods and assumptions that will be employed to develop the benchmarks. It is the intent of the State Employees' Assurance Department Board of Directors that the Funding Policy outlined herein will remain unchanged until the objectives below are met.

I. Funding Objectives

The goal in requiring employer and member contributions to the System is to accumulate sufficient assets during a member's employment to fully finance the benefits the member's beneficiary is expected to receive in the event of the death of the member during the member's retirement. In meeting this objective, the System will strive to meet the following funding objectives:

- To develop a pattern of contribution rates expressed as a percentage of employer payroll and measured by valuations prepared in accordance with applicable State laws and the principles of practice prescribed by the Actuarial Standards Board.
- To maintain a stable funded ratio (ratio of actuarial value of assets to actuarial accrued liabilities) that reflects a trend of strong actuarial condition. The long-term objective is to maintain at least a 100% funded ratio over a reasonable period of future years.
- To maintain adequate asset levels to finance the benefits promised to members and monitor the future demand for liquidity.
- To promote intergenerational equity for taxpayers with respect to contributions required for the benefits provided by the System.

II. Measures of Funding Progress

To track progress in achieving the System's funding objectives, the following measures will be determined annually as of the actuarial valuation date (with due recognition that a single year's results may not be indicative of long-term trends):

- **Funded ratio** – The funded ratio, defined as the actuarial value of assets divided by the actuarial accrued liability, should remain stable over time, before adjustments for changes in benefits, actuarial methods, and/or actuarial adjustments. The target funded ratio will be 100 percent. In the event that the funded ratio falls below 100%, the targeted funded ratio will be 100% within 20 years of the date the funded ratio first falls below 100%.
- **Unfunded Actuarial Accrued Liability (UAAL)**
 - **Transitional UAAL** – The UAAL established as of the initial valuation date for which this funding policy is adopted shall be known as the Transitional UAAL.
 - **New Incremental UAAL** – Each subsequent valuation will produce a New Incremental UAAL consisting of all benefit changes, assumption and method changes and experience gains and/or losses that have occurred since the previous valuations.

SCHEDULE F - FUNDING POLICY #2 OF THE SEAD BOARD OF DIRECTORS

- **UAAL Amortization Period**

- The transitional UAAL will be amortized over a closed 20 year period beginning on the initial valuation date for which this funding policy is adopted.
- Each New Incremental UAAL shall be amortized over a closed 20 year period beginning with the year it is incurred.

- **Employer Contribution Rate**

- **Employer Normal Contribution Rate** – the contribution rate determined as of the valuation date each year to fund the employer portion of the annual normal cost of the System based on the assumptions and methods adopted by the Board.
- In each valuation subsequent to the adoption of this funding policy the required employer contribution rate will be determined as the summation of the employer Normal Contribution Rate, a contribution rate for administrative expenses, the amortization rate for the Transitional UAAL and the individual amortization rate for each of the New Incremental UAAL bases.
- In no event shall the employer contribution rate be less than 0%.
- The valuation methodology, including the amortization of the Unfunded Actuarial Accrued Liability (UAAL), would be expected to maintain reasonably stable contribution rates as a dollar per active member.

III. Methods and Assumptions

The annual actuarial valuations providing the measures to assess funding progress will utilize the actuarial methods and assumptions last adopted by the Board based upon the advice and recommendations of the actuary. These include the following primary methods and assumptions:

- The actuarial cost method used to develop the benchmarks will be the Projected Unit Credit (PUC) actuarial cost method.
- The long-term annual investment rate of return assumption will be:
 - Effective with the June 30, 2013 valuation date, 7.50% net of investment expenses.
 - Effective with the June 30, 2017 valuation date, reduced by 0.10% (10 basis points) from the immediate prior actuarial valuation, as long as the following conditions are met:
 - The actual rate of return for the fiscal year ending with the current valuation date exceeds the assumed rate of return from the immediate prior actuarial valuation, and
 - The assumed rate of return does not decrease below 7.00% net of investment expenses.
- The actuarial value of assets will be equal to the market value of assets as of the valuation date.

SCHEDULE F - FUNDING POLICY #2 OF THE SEAD BOARD OF DIRECTORS

The employer contribution rates determined in an annual actuarial valuation will be at least sufficient to satisfy the annual normal cost of the System and amortize the UAAL as a level dollar amount over a period not to exceed 20 years. However, in no event shall the employer contribution rate be less than 0%.

The actuary shall conduct an investigation into the System's experience at least every five years and utilize the results of the investigation to form the basis for recommended assumptions and methods. Any changes to the recommended assumptions and methods that are approved by the Board will be reflected in this Policy.

IV. Funding Policy Progress

The Board will periodically have actuarial projections of the valuation results performed to assess the current and expected future progress towards the overall funding goals of the System. These periodic projections will provide the expected valuation results over at least a 10-year period. The projected measures of funding progress and the recent historical trend provided in valuations will provide important information for the Board's assessment of the System's funding progress.
